GRADE DESCRIPTION:

Crushed, fine, dry, screened salt. Rewashed, kiln dried and screened.

Solar salt is a natural mineral which is harvested from fresh seawater. Small traces of extraneous matter (as measured by "water insoluble matter") remain in the salt after refining. Quantities of extraneous matter do vary from time to time. Physical separation techniques used by Dominion Salt are typical of those used in Solar Salt refineries around the world and are designed to minimise the level of extraneous matter. Where the salt is used to make brines, it may be necessary to filter the brine. Where extraneous matter is unacceptable the recommended aesthetically cleaner alternative salt is recrystallized Pacific® PDV (Pure Dried Vacuum) Standard Grade Salt.
