SAFETY DATA SHEET: SALT

Lake Grassmere & S.I. Refinery

Kaparu Road, PO Box 81, Seddon Marlborough, New Zealand Phone: 64 3 575 7021 Fax: 64 3 575 7002

Email: sales@domsalt.co.nz Website: www.domsalt.co.nz

Section 1: Identification of the Substance

Product name:	All grades of Solar salt, Pure Dried Vacuum Salt including Pharmaceutical grades (Sodium Chloride)	
Recommended use:	Various	
Company details:	Details as above	
Address:	Details as above	
Telephone Number:	+64 7 575 6193 Head office Mount Maunganui New Zealand	
Emergency telephone Number:	Outside New Zealand: +64 3 35 30199 Within New Zealand: 0800 Chemcall ® (0800 243 62255)	
Date of preparation:	14 September 2020	

Section 2: Hazards Identification

Inhalation :	Very high concentrations of salt dust may result in inflammations of the mucus membranes of the respiratory tract.
Skin Contact	t : Dry salt and concentrated solutions can cause withdrawal of fluid from the skin and may, on prolonged contact, produce irritation.
Eye Contact	: Salt and salt solutions are not toxic to the eye but concentrations much above that of tears cause a stinging sensation.
Ingestion :	Acute and chronic toxic effects can result from the ingestion of excessive amounts of either salt or brine. Salt should not be used as an emetic to induce vomiting. High concentrations produce inflammatory reactions in the gastrointestinal tract and can cause vomiting, diarrhea, convulsions and collapse. The ingestion of hypertonic solutions can cause fatal disturbance of body electrolyte and fluid balance particularly in the young and elderly. Less than a tablespoon of salt may severely poison an infant and sometimes prove fatal.
ISNO Approved	MSDS Page 1 September 14, 202

Section 3: Classification and type

Chemical Name :Sodium ChlorideSynonyms:Halite, common salt, PDV salt, solar saltChemical Formula:NaClCAS Number:7647-14-5HASNO Classification:6.1E and 6.4A Toxic & skin and eye irritant.

The product has not been classified as dangerous according to GHS

Section 4: First Aid Measures

Inhalation :	Remove patient to fresh air. Keep warm and at rest. Give drinks if desired.
Ingestion :	Vomiting will probably occur. Provided the patient is conscious give plenty of liquid to drink. Obtain immediate medical attention especially if vomiting has not occurred.
Eye Contact :	Irrigate with eyewash solution or water. If symptoms develop obtain medical help.
Skin Contact :	Wash with plenty of water.
Workplace facilities :	Emergency showers and eye wash recommended
NOTES FOR MEDICAL PERSONNEL	
Swallowed :	Give water to drink. No need to induce vomiting.
Eye :	Irrigate with copious quantities of slow flowing water for up to 15 minutes. Eyelids to be held open
Skin :	Brush off clothing and wash skin thoroughly with plenty of water.
Inhaled :	Not normally a risk but some may experience some discomfort if working with dusty product. If exposure has occurred allow the victim to drink water.

Section 6: Accidental Release Measures

Personal precautions:	Avoid prolonged contact with the skin and inhalation of dust concentrations, otherwise normal good handling and housekeeping practice is adequate. No special protective clothing is required.
	An eyewash bottle with clean water should be available.
Spillages :	Spillages should be swept up or may be safely water hosed to drain under normal circumstances

Section 7: Handling and Storage

Handling :	Salt dust is non-flammable but static electricity can be generated by pneumatic conveying, therefore pipes should be bonded and earthed, especially in environments where a spark could prove hazardous.
Storage :	Due to its hydroscopic nature, salt should be stored in a dry atmosphere and away from concentrated acids. Absorbs moisture if the relative humidity is above 75 %
	Product should be stored in such a way that it does not present a hazard if product were to fall

Section 8: Exposure Controls/Personal Protection

Subsection 1: Workplace Exposure Guidelines	
Occupational Exposure :	As total dust 10mg/m₃ (8hr TWA)
Limits :	As respirable dust 4mg/m₃ (8hr TWA)
Dangerous Exposure :	Non specified.
Engineering Controls :	Static electricity can be generated by pneumatic conveying, therefore pipes should be bonded and earthed, especially in environments where a spark could prove hazardous
Subsection 2: Engineeri	ng Controls
Respiratory Protection :	If the process is such that salt dust is generated, a disposable face mask should be worn.
Hand Protection :	Gloves to be worn if prolonged contact is anticipated. Dry salt and concentrated solutions can cause withdrawal of fluid from the skin.
Eye Protection :	Wear chemical safety goggles in situations where contact with the eyes may occur.
Skin Protection :	Skin should be washed to remove salt. Dry salt and concentrated solutions can cause withdrawal of fluid from the skin.
Other Protective Measures :	An eyewash and hand washing facilities should be readily available.

Section 9: Physical and Chemical Properties

Appearance :	Crystalline solid
Colour :	White / Colourless
Boiling Point :	1413°C
Melting Point :	802°C
Flammability :	Non-flammable
Flash Point :	Non-flammable
Explosive Properties :	Non-flammable
Oxidising Properties :	Non-flammable
Vapour Pressure :	2.4mm Hg at 747°C
Density :	2.165 gm / cc (of crystalline solid at 20°C)
Water Solubility :	35.9 g/100g at 0°C
	39.2 g/100g at 100°C
Viscosity :	Not applicable
Vapour Density :	Not applicable

Section 10: Stability and Reactivity

Chemical stability :	Stable	
Conditions to avoid :	Reacts with strong sulphuric acid or nitric acid to give hydrogen chloride gas.	
Material to avoid :	Under wet conditions can corrode many common metals, particularly iron, aluminum and zinc. Stainless steel and monel resist attack.	
Hazard Decomposition Products :	Trace amounts of hydrogen chloride gas may be evolved at temperatures in excess of 800°C. Contains no water of crystallization. Does not react with alkalis at ordinary temperatures	

Section 11: Toxicological Information

Eyes :	Dust may be irritating
Skin :	Irritation after prolonged contact
Ingestion :	Salt is an essential constituent of the diet. It provides important body electrolytes and is the source of hydrochloric acid present in the gastric juices. The blood stream contains nearly 1% sodium chloride. In normal industrial use salt is non- hazardous. LD50 3000mg/kg oral, rat.
Inhalation :	Dusts may be irritating.
Carcinogenicity :	Not considered to be a carcinogen.
Mutagenicity :	Not considered to be a mutagen.
Reproductive Effects :	Non identified.

Section 12: Ecological Information

A maximum value of 412 mg/l ensures the protection of all aquatic life. Source: Water Research Centre - September 1990

> 96 hour LC 50 (Fish) 6750 mg/l 48 hour EC 50 (Daphnia) 2024 mg/l 72 hour IC 50 (Algae) 3014 mg/l Daphnia Sub acute 1062 mg/l Fish Subacute 433 mg/l BOD 5 day 0 mg/l COD 0 mg/l Earthworm Toxicity 1000 hg/cm2

Section 13: Disposal Considerations

Spills :	Collect solid salt in a conventional manner, wash the spill area down with water if necessary.
Disposal :	Refer to the Local council bylaws and Land Waste Management Authority. Dissolved material in excess water is normally suitable for disposal in storm water system.

Section 14: Transport Information

Material is not included in the requirements for "Transport of Dangerous Goods on Land"

EEC Classification: Under The Chemicals (Hazard Information and Packaging for Supply) Regulations 2002, this material is not dangerous for supply or conveyance.

Section 15: Regulatory Information

Regulatory Status:

Approved by New Zealand Environmental Protection Authority - HSNO Approval Code HSR002722.

Safety Phrases:

S 22 Do not breathe dust.

S 24/25 Avoid contact with skin and eyes.

S 26 In case of contact with eyes rinse immediately with plenty of water and seek medical advice.

Risk phrases:

S 36/37/38 Irritating to eyes, respiratory system and skin.

Section 16: Other Information

Storage :

Being hydroscopic, salt must be stored correctly to prevent and change in physical condition. Dried salt should be stored in a dry atmosphere and unrefined solar salt in a medium dry atmosphere.
