COUNTRY OF ORIGIN:

Made in New Zealand

BULK DENSITY:

Nominally: loose 1.13g/ml, compacted 1.31g/ml

GRADE DESCRIPTION:

Ex stack, crushed, washed and kiln dried. Second crush to 4mm, coarse fraction sieve separated and fines removed. Solar salt is a natural mineral which is harvested from fresh seawater. Small traces of extraneous matter (as measured by “water insoluble matter”) remain in the salt after refining. Quantities of extraneous matter do vary from time to time. Physical separation techniques used by Dominion Salt are typical of those used in Solar Salt refineries around the world and are designed to minimise the level of extraneous matter. If extraneous matter particles are a problem in your process or product, we recommend optical sorting and separation. Where the salt is used to make brine, it may be necessary to filter the brine.
